

## PRESS RELEASE

### Blue Fuel Energy concludes financing agreement with RBC Capital Markets

VICTORIA, July 8, 2015 — [Blue Fuel Energy Corporation](#) (BFE) of Victoria, British Columbia, Canada is pleased to announce that it has engaged the services of [RBC Capital Markets](#) to raise capital for its proposed renewables-and gas-to gasoline fuels plant in northeastern British Columbia. Ranked amongst the 12 largest global investment banks, RBC Capital Markets is part of the Royal Bank of Canada, one of the 15 largest banks in the world.

“We have been in dialogue with RBC Capital Markets for many years on a range of opportunities and have developed considerable mutual trust”, said Juergen Puetter, CEO of Blue Fuel Energy. “Initially, perhaps, we were ahead of the curve, but RBC Capital Markets has patience and vision; they have stuck with us, recognizing the value inherent in the refinements we have made and the growing demand for a drop-in liquid fuel — which we can make greener and greener as demand grows commensurate with the price on carbon rising.”

Blue Fuel Energy anticipates completing initial financing in the fall of 2015 and making a final investment decision as early as end-2016. The plant is expected to be fully operational approximately three years after commencement of construction, producing just shy of 1 billion liters of low carbon intensity gasoline annually.
